PROFESSIONAL SUMMARY

Associate PMO at Anunta Tech with hands-on full-stack and AI development experience in Java, Spring Boot, React, REST APIs, and LLM integration (LangChain4j, Gemini, Groq), supporting Omnissa Horizon and Workspace ONE (WS1) Accelerator services across 12+ projects. Experienced in building and deploying AI-integrated applications with Docker, Render, and Vercel, end-to-end testing, and project coordination and stakeholder communication.

TECHNICAL SKILLS

Frontend & AI: React, Vite, HTML/CSS, Tailwind CSS, LangChain4j, LLM Integration, Gemini, Groq, Firebase
Backend: Java, Spring Boot, REST APIs, Hibernate, JDBC, Oracle SQL, H2 Database
DevOps & Testing: Docker, Render, Vercel, Git, GitHub, Playwright, Pa11y
Delivery: Project Coordination, Ticket Management, Issue Tracking, Stakeholder Management, Jira
Platforms: Omnissa Horizon, Workspace ONE

PROFESSIONAL EXPERIENCE

Anunta Tech April 2026 – Present
Associate PMO | Omnissa Horizon & Workspace ONE Accelerator

- **Project Coordination:** Coordinated 12+ concurrent projects, tracking milestones, deliverables, dependencies, and action items to support execution against project schedules.
- **Ticket & Issue Management:** Managed 250+ project tickets, monitored issue status, coordinated technical follow-ups, and reported a 30% reduction in pending tasks.
- **Stakeholder Management:** Facilitated communication across 13 internal teams and 13 client organizations, aligning priorities and dependencies to improve service delivery timelines by 20%.
- **Governance & Meetings:** Scheduled and supported weekly project reviews and client status calls, recording minutes of meeting (MoM) and tracking action items through to closure with owners and due dates.
- **Risk & Escalation:** Maintained RAID logs (risks, assumptions, issues, dependencies) for active projects and escalated blockers to project managers early to protect milestone dates.
- **Reporting & Documentation:** Prepared 30+ status reports and maintained project trackers, documenting progress, risks, pending actions, and deliverables for management and stakeholder reviews.
- **Tracking & Dashboards:** Built Jira filters and dashboards to monitor ticket ageing, open vs. closed trends, and SLA status, giving leads a single view of delivery health.
- **Resource & Service Delivery:** Monitored resource allocation across 15+ team members and coordinated Horizon and WS1 service activities, supporting workload visibility and operational planning.
- **Technical Delivery Support:** Worked with engineers on Horizon VDI and WS1 UEM activities, tracking environment readiness checklists, kickoff prerequisites, and handover and closure documentation for client sign-off.

PROJECTS

Veritas | AI-Powered Multi-Model Chat Assistant
Java, Spring Boot, LangChain4j, React/Vite, Tailwind CSS, Firebase, Gemini, Groq, Docker, Playwright, Pa11y

- **AI Orchestration:** Integrated a 6-model AI fallback chain across Gemini and Groq, implementing quota-aware switching and automated cooldown handling to improve service continuity.
- **LLM Integration:** Used LangChain4j to abstract model providers behind a common interface, managing prompts and conversation context so new models can be added without changing the API layer.
- **Full-Stack Development:** Developed Spring Boot REST APIs and a responsive React/Vite frontend with Tailwind CSS, integrating Firebase Authentication for user access management and token verification on protected endpoints.
- **Reliability & Error Handling:** Added centralized exception handling, request validation, and clear user-facing error states for rate limits, timeouts, and provider outages.
- **Deployment & Testing:** Containerized the backend with Docker and deployed it on Render, with the frontend on Vercel. Implemented 4 test categories covering API health, CORS, authentication workflows, and AI chat functionality, plus Playwright and Pa11y checks for end-to-end flows and accessibility.

JOB SIMULATIONS

Boston Consulting Group (BCG) GenAI | Forage | Oct 2026

- Developed financial chatbot logic using Python and pandas, analyzing corporate 10-K and 10-Q reports and applying rule-based processing to generate accessible financial insights.
- Extracted key financial metrics such as revenue, net income, total assets, and cash flow, and calculated year-over-year trends to support the chatbot's responses to common user queries.

CBRE Project Management | Forage | Oct 2026

- Reviewed a showroom project plan for a kitchen appliance manufacturer and developed a Gantt chart to track milestones, schedules, risks, and project dependencies.
- Identified critical-path tasks and scheduling conflicts, and drafted a stakeholder update recommending mitigation steps to keep the showroom launch on track.

EDUCATION

Jain College of Engineering and Research 2021 – 2025
B.E. Computer Science | CGPA: 7.40 Belagavi, India
Jain PU College 2021
Science Stream | 68% Belagavi, India
